

ROCKEY Data Recorder

ROCKEY Data Recorder is the tool to manage dongles. Software reseller can use this to record the info of issued dongles. Such tool stores the passwords, hardware ID, user ID, user data zone, and your memo in the database.

The ROCKEY Data Recorder tool consists of 2 files; the 'rockey.mdb' is an Access database file, which stores all the info of dongles. 'ROCKEY4DataRecorder.exe' is the executable file to run the application.

Run 'ROCKEY4DataRecorder.exe' and the main dialog is shown.

ROCKY Data Recorder

Hardware ID:

User ID

User Data Zone

```
0000 00 00 00 00 00 00 00 .....
0005 00 00 00 00 00 00 00 .....
0010 00 00 00 00 00 00 00 .....
```

Memo:

Users need to input the 4 passwords of the ROCKY dongle. The check box, 'auto save' will help user to remember the passwords.

'Refresh' will read all info from the dongle. Press 'Refresh', the hardware ID, User ID and User Data Zone will be show in the corresponding text boxes.

ROCKY Data Recorder

Hardware ID:

User ID

User Data Zone

```
0000 74 68 69 73 20 69 73 20 this is
0005 61 20 74 65 73 74 20 20 a test,
0010 61 20 74 65 73 74 20 20 a test
```

Memo:

You can use 'copy' to copy the corresponding info to clipboard.

To edit User Data Zone, you can select an area and modify the info or paste info.

Note: 'save' does not change anything in the ROCKEY dongle, but only save the data to the database.

The 'delete' at right corner will delete the selected record from the database.

“<<All Records” will hide the right side of the window while “All Records>>” will show it.
